Education

Alvancity School

Master of Science in Generative AI (Eduniversal Innovation Award - The New Standard)

Paris, France

Oct 2025 -Present

National Institute of Applied Sciences and Technology (INSAT)

Software and AI Engineering Degree (Top 1 Engineering School)

Tunis, Tunisia

Sep 2020 -Sep 2025

Professional Experience

Socotec Monitoring

AI Engineer

Paris, France

Mar 2025 -Present

Apprentice (Nov 2025 -Present)

- Architecting and deploying production-grade, LLM-powered multi-agent systems leveraging LangGraph and AWS Bedrock
- Designing scalable AI solutions with emphasis on reliability, performance optimization, and production readiness

Intern - End-Of-Study (Mar 2025 -Sep 2025)

- Engineered a multi-agent system using LangGraph for automated electrical panel analysis, integrating OCR extraction, intelligent database querying, and Canvas v4-compliant output generation
- Developed and deployed a YOLOv11 object detection model on AWS SageMaker for real-time circuit breaker identification across field operations
- Designed and implemented an automated web scraping pipeline to aggregate product specifications from major manufacturers, establishing a centralized reference database in Amazon RDS

Technical environment: LangGraph, AWS Bedrock, AWS SageMaker, AWS RDS, AWS EKS, Python, YOLOv11, Production AI Systems

Lightray Technologies

Part-Time AI Engineer

Cyprus, Remote

Sep 2024 -Dec 2024

- Contributed to a large-scale financial market prediction system leveraging LLaMA3.1 405B to replicate institutional investor decision-making workflows
- Led data collection and augmentation efforts, engineering custom datasets through advanced web scraping methodologies, expanding training corpus by 25%
- Collaborated on optimizing the fine-tuning pipeline using Snowflake framework, contributing to a 30% reduction in training time through multi-GPU architecture implementation
- Technical environment:** LLaMA3.1 405B, LLaMA3.1 70B, LoRA, Snowflake framework, multi-GPU with p2p communication, TensorRT-LLM, Triton inference server, Web Scraping

Appicare.AI

MLOps Intern

Montreal, Canada (Remote)

Jun 2024 -Sep 2024

- Optimized LSTM, GRU, and Transformer architectures on the MIMIC-III clinical dataset, achieving 25% improvement in prediction accuracy
- Developed and containerized a real-time patient outcome prediction application using Docker, deployed on Azure with comprehensive MLOps pipeline integration via MLflow, enhancing model reproducibility by 40%
- Technical environment:** MLflow, Docker, Streamlit, GitHub Actions, Azure Container Registry, Azure Container Instance, Azure Monitor, MIMIC-III dataset

VERMEG

Generative AI Intern

Tunis, Tunisia

Jul 2023 -Aug 2023

- Developed an intelligent chatbot leveraging LangChain's RAG architecture to streamline access to Vermeg's proprietary Palmera framework, achieving 25% improvement in response accuracy
- Enhanced document retrieval efficiency by 30% through implementation of vector embeddings and optimized similarity search algorithms
- Designed and deployed an intuitive Streamlit interface for seamless real-time user interactions
- Technical environment:** Large Language Models, LangChain, ChromaDB, Streamlit

Academic Projects

INSAT

Kubernetes Deployment Strategy Analysis on AKS

Apr 2024 -May 2024

- Architected and deployed containerized applications on Azure Kubernetes Service using GitLab CI/CD and Helm charts, conducting comparative analysis of deployment strategies to minimize downtime, achieving 40% faster deployment cycles and 20% reduction in failure rates

INSAT

Deep Learning for Image Anomaly Detection

Jan 2024 -Jun 2024

- Designed and implemented an autoencoder-based anomaly detection system for unsupervised defect identification, leveraging reconstruction error analysis to achieve robust detection of visual anomalies with improved accuracy and reliability

Technical Skills

Python, AWS, LangGraph, LangChain, Docker, Kubernetes, GitHub, Project Management

Extra Curricular Activities

Google Developer Student Club (Sep 2022 -Jan 2023), Securinets Club (Sep 2022 -Jun 2023)
